Severe Impacts

# **WEATHER KEY POINTS**

**02/24/22 - 03/02/22**

## **Thursday - Wednesday**

- Very cold overnight low temperatures are expected for many areas of the state through Friday morning, with a notable warming trend for the weekend and into early next week
  - Temperatures near or below freezing will be noted in many areas, including areas near the coast, even into southern California
- A period of gusty offshore winds is forecast across the southern California mountains on Saturday, with local gusts of 30 to locally 45 mph possible
- Dry weather is expected for late week statewide, with some light precipitation redeveloping at times across northern California Saturday night through the middle of next week, though no widespread weather impacts are currently anticipated

# PRECIPITATION FORECAST

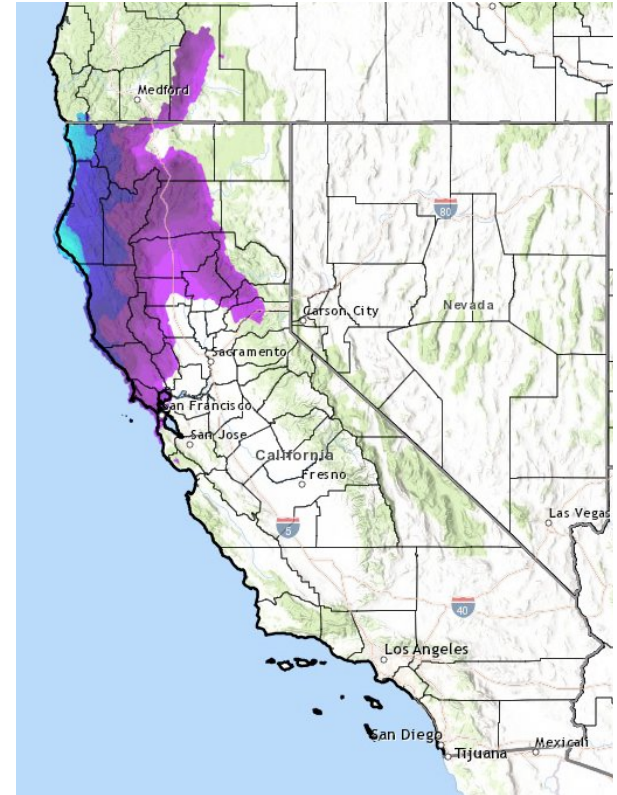

02/24/22 - 02/26/22

**Thursday**

**Friday**

**Saturday**

**Note:** Forecast precipitation amounts are an average for any particular location. Thunderstorms may produce locally higher rainfall amounts.

**Precipitation (inches)**

# **WEATHER OUTLOOK**

**03/01/22 - 03/09/22**

## **6-10 Day Outlook (March 1 - March 4)**

### **Temperatures**

- Above normal temperatures are favored for much of southern and central California, with near normal readings favored for northern portions of the state

### **Precipitation**

- Below normal precipitation is favored across central and southern California, with near normal values favored for the north

## **8-14 Day Outlook (March 3 – March 9)**

### **Temperatures**

- Below normal temperatures are favored across northern and central California, with near normal readings favored across southern parts of the state

### **Precipitation**

- Below normal precipitation is slightly favored over the western half of the state, with near normal precipitation favored across eastern California
